Brand: Alpine Car Audio
Product Code: ALPINE iLX-W670-M
Stock: 4
UPC: 793276002563
MPN: ALPINE iLX-W670-M
Location: Cleveland, Ohio

Price: $399.95

Short Description
Add Apple CarPlay and AndroidAuto to your vehicle with this 7" touchscreen with Bluetooth and USB

Description

The Alpine iLX-W670-M is a 7-inch ultra-shallow digital multimedia receiver featuring wired Apple CarPlay®, wired Android Auto™, iDatalink Maestro compatibility, SiriusXM readiness, Bluetooth®, USB, backup camera input, 13-band sound tuning, and three pairs of 4V RCA pre-outs.

The biggest upgrade over the original iLX-W670 is the addition of iDatalink Maestro compatibility when used with the proper Maestro interface.

Alpine iLX-W670-M Digital Multimedia Receiver

The Alpine iLX-W670-M builds on the popular iLX-W670 by adding iDatalink Maestro compatibility while keeping the compact shallow-chassis design and smartphone features drivers already liked.

It includes wired Apple CarPlay®, wired Android Auto™, Bluetooth®, SiriusXM readiness, PowerStack capability, backup camera input, and Alpine sound quality in an ultra-shallow double-DIN chassis.

** **Access 1 Installation Benefit: Qualifying Alpine products** purchased from and professionally installed by **Access 1 Alarm & Audio** include a **FREE 2-Year Replacement Warranty**. Vehicle-specific installation parts and labor are required for most vehicles and are additional.*

Intuitive Touchscreen Interface

The iLX-W670-M features a bright 7-inch class double-DIN touchscreen display with a clean, easy-to-use interface. Whether you are choosing music, using navigation through Apple CarPlay or Android Auto, adjusting audio settings, or switching sources, the layout is simple and driver friendly.

The ultra-shallow chassis design also helps with installation flexibility in many vehicles where traditional double-DIN receivers may have limited space behind the dash.

Wired Apple CarPlay and Android Auto

The iLX-W670-M supports wired Apple CarPlay and wired Android Auto, allowing compatible smartphone features to appear directly on the Alpine touchscreen.

Use compatible navigation apps, make calls, send and receive messages, listen to music, and access supported apps while keeping your focus on the road.

Enhanced Audio and Ambiance

The iLX-W670-M includes Alpine’s Sound Boost menu with Bass Boost, Mid-Bass Boost, subwoofer controls, and easy sound adjustments. It also supports Lighting Link control for compatible Alpine PrismaLink™ subwoofer enclosures.

This makes the iLX-W670-M a strong foundation for a full Alpine sound system upgrade with better control over both sound and system appearance.

Fine Tune Your Sound

Alpine gives you serious sound control with a 13-band graphic equalizer, 6-channel time correction, and crossover control for the front speakers, rear speakers, and subwoofer.

The iLX-W670-M also includes three pairs of 4V RCA pre-outs for front, rear, and subwoofer amplifier connections, making it a strong choice for future system expansion.

PowerStack Capable

The iLX-W670-M uses an ultra-shallow 2.4-inch chassis and is PowerStack™ capable, allowing compatible Alpine KTA-Series Power Pack amplifiers, sold separately, to mount directly behind the radio.

PowerStack capability is ideal when you want more power without taking up extra space under a seat, behind a panel, or in the trunk.

---

iDatalink Maestro Compatibility

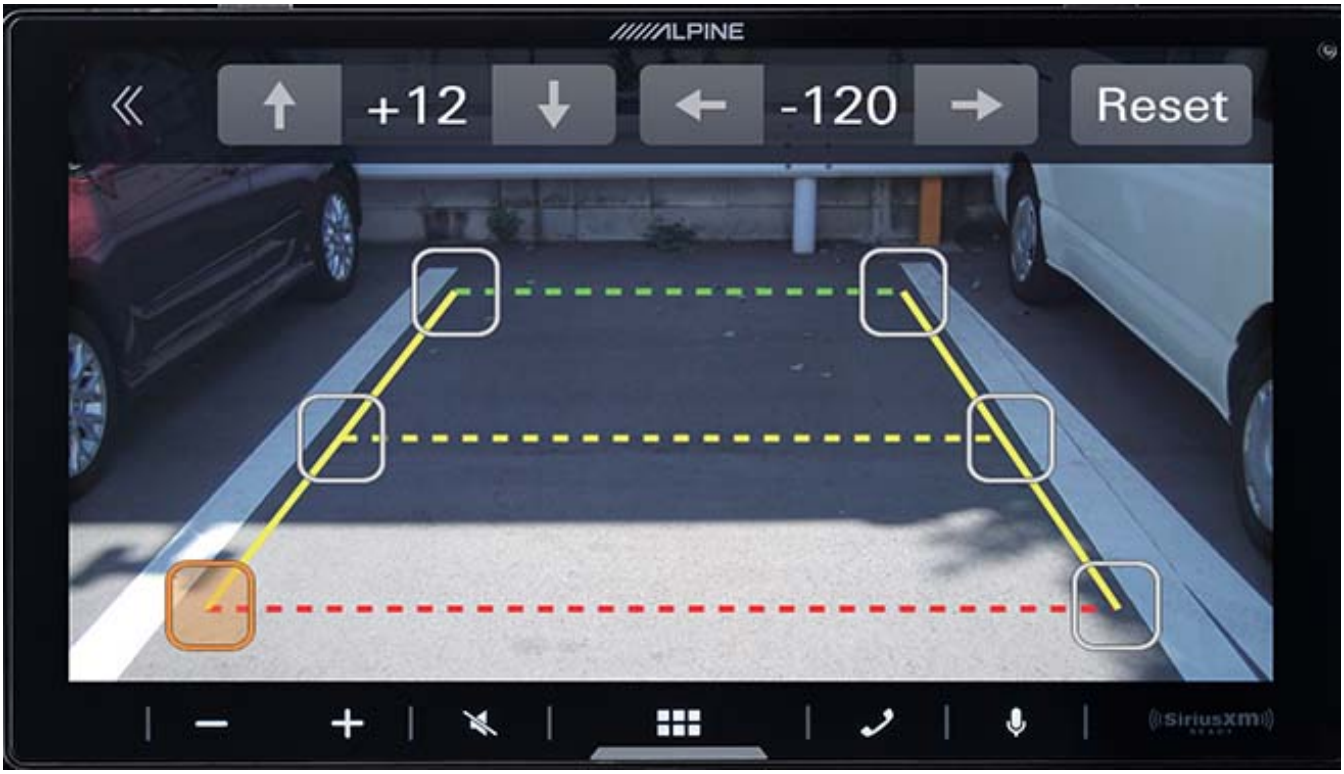
The major difference between the original iLX-W670 and the new iLX-W670-M is iDatalink Maestro compatibility.

When installed with the compatible iDatalink Maestro interface, the Alpine iLX-W670-M can provide enhanced integration with select factory vehicle systems. Depending on the

vehicle and Maestro application, this may allow retention or display of factory features such as steering wheel controls, vehicle information, performance gauges, climate information, parking sensor information, factory amplifier integration, and other vehicle-specific functions.

Maestro compatibility is vehicle dependent and requires the correct iDatalink module, vehicle-specific harness, flashing, and professional installation. Access 1 Alarm & Audio can help determine what features can be retained or displayed in your specific vehicle.

Not every vehicle supports the same Maestro features. Our trained technicians can explain exactly what functions will be retained for your specific year, make, and model before installation.



Add a Backup Camera

The Alpine iLX-W670-M includes a dedicated camera input, allowing a rear-view camera or compatible front-view camera to be added depending on the vehicle and installation configuration.

A camera upgrade can make parking, reversing, and maneuvering in tight spaces much easier. Access 1 Alarm & Audio can professionally install the iLX-W670-M with camera

integration, steering wheel control retention, Maestro integration, and other vehicle-specific accessories.

The Access 1 Advantage

Anyone can sell you a new Alpine multimedia receiver, but Access 1 Alarm & Audio ensures it's installed correctly and backed by benefits many retailers simply don't offer.

The Access 1 Advantage Includes:

- **FREE 2-Year Replacement Warranty**
  Available on qualifying Alpine products purchased from and professionally installed by Access 1 Alarm & Audio.
- **Lifetime Workmanship Warranty** for as long as you own your vehicle.
- **Highly Trained MECP Certified Technicians** with the knowledge and experience to properly integrate today's advanced vehicle electronics.
- **Vehicle-Specific Installation Solutions** designed to retain factory features whenever possible, including steering wheel controls, factory amplifiers, USB ports, backup cameras, and iDatalink Maestro integration.
- **Professional Installation** using quality installation accessories and industry best practices for reliable, factory-quality results.

**** Installation Note:*** *Vehicle-specific installation parts and professional labor are required for most vehicles and are additional.*
