Price: \$1,399.99

Short Description

Alpine Powered Sound System Upgrade for the 2018+ Jeep Wrangler JL and 2020+ Jeep Gladiator JT

Description

This 300-watt powered sound system upgrade increases overall dynamic range and adds much-needed “top-off” sound performance to the Jeep Wrangler JL and Jeep Gladiator.

Enjoy premium sound quality even with your top off! The PSS-23WRA2 is a 300-watt sound system upgrade featuring a powered subwoofer, amplifier, and tweeters for the 2018-23 Jeep Wrangler Unlimited JL and Jeep Gladiator JT.

The PWE-S8 subwoofer is engineered to load and disperse lower-frequency sound into the passenger’s foot well area to maximize bass extension throughout the Jeep for improved bass you can feel. Included with the subwoofer is a remote bass knob so you can control the bass level from the convenience of your dashboard. The Included 4-channel amplifier more than doubles the power over the factory system allowing you to enjoy your tunes with the top off.

The included SPR-10TW-WRA High-Performance Component Tweeters replace the factory tweeters on the top of the dash and add a high-frequency response

for crisp, clean audio that is lacking in factory Jeep systems.

FEATURES

- 45W x 4 + 120W RMS System Power (300W)
- Pre-assembled kit; ready to mount, plug and play system
