Short Description

Alpine 300-Watt Complete Sound System Upgrade Package for the 2018+ Jeep Wrangler and 2020+ Jeep Gladiator

Description

This 300-watt powered complete sound system upgrade increases overall dynamic range and adds much-needed “top-off” sound performance to the Jeep Wrangler JL and Jeep Gladiator.

Go beyond your wildest expectations for sound with this complete sound upgrade package. The PSS-24WRA has 5-channels of powered sound that replaces your factory system. The package includes two sets of 6.5” weather-resistant mid-bas drivers and 1” weather-resist tweeters that replace the front and rear soundbar factory speakers, an 8” powered, compact subwoofer and a 4-channel power pack amplifier.

Your Jeep® begs for top-off drives, whether cruising down the highway or weaving through trails, so you need a sound system that delivers music for all your adventures. The PSS-24WRA is a 300-watt Complete Sound System Upgrade Package for the four-door, non-amplified 2018-23 Jeep® Wrangler and non-amplified 2020-23 Jeep® Gladiator.

The PSS-24WRA sound system is tuned for the unique cabin environment of the 2018-23 Jeep® Wrangler and 2020-23 Jeep® Gladiator. The weather-resistant speakers are designed for powerful, top-off performance that's unhindered by weather, wind, or other noise while driving. The 6.5" mid-bass drivers bring out the full potential of your sound, while the tweeters capture the high frequencies often lost in music reproduction. The 8" compact subwoofer adds deep, accurate bass that grounds your sound system.

FEATURES

- Complete, five-channel powered sound system upgrade package
- Compatible with four-door, non-amplified 2018-23 Jeep® Wrangler and non-amplified 2020-23 Jeep® Gladiator*
