Price: \$549.99

Short Description

JBL Single 12-Inch Bandpass 600-Watt Bass Package

Description

JBL Single 12-Inch Bandpass 600-Watt Bass Package

Some car audio fans love the clarity of sealed subwoofer enclosures. Others crave the added power of vented enclosures. The GT-12BP bandpass subwoofer offers both. It delivers accurate bass response and thundering power—as well as a bold look. The stylish box features a look-in acrylic window shaped like the JBL exclamation point, making the GT-12BP as appealing to the eyes as it is to the ears. And the sturdy enclosure shields the 12-inch polypropylene woofer from items that might shift in your trunk.

The new high performance JBL Club A600 amplifier delivers world class JBL power from a compact chassis built to fit in more vehicles, even when space is tight. The Club A600 features variable crossovers and bass boost for precise control and tuning, plus high and low level inputs that let them integrate with most car stereos. An included wired remote bass level control can be mounted for convenient volume adjustment from the driver seat. The great value of the GT-12BP paired with the Club A600 proves you don't have to spend a fortune to enjoy legendary JBL bass.
