Genuine Viper Second-Generation Responder LE Remote

This is a **brand-new genuine Viper remote control from the original manufacturer**.

Viper's second-generation Responder LE remote features five rubberized buttons in a slim, ergonomic design for comfortable single-handed operation.

Its 2-way communication provides confirmation when compatible remote start and security commands are received by the vehicle. The updated 7254-series design also improved upon several aspects of the earlier 7251-series remote, including the battery-cover design.

Compatibility Information

If a 7251 or 7254 series remote previously operated your system, then you already know the 7254V is compatible with that system.

- If you are replacing a different model remote, compatibility is determined by the actual **Viper, Python, Clifford or Automate** remote start/security system installed in the vehicle.
- On certain systems, compatibility can also depend on the **Control Center / Antenna**.
- *** Models marked with an asterisk require a new antenna. Contact Access 1 Alarm & Audio to purchase the antenna.**
- If you are unsure which remote your system requires, contact Access 1 Alarm & Audio before ordering. We can help identify the correct replacement remote.

Programming Instructions

7254V Programming Instructions

Responder LE 2-Way SuperCode Remote Control

The following Learn Routine is used to program this replacement transmitter to the system. Programming is performed using the button on the vehicle's windshield-mounted **Control Center / ANTENNA**.

Open a door.

Turn the ignition **ON**.

Press, release, and then press and hold the programming button on the **Control Center / Antenna**.

The Control Center LED flashes and the siren or horn sounds one time to confirm the system is prepared. Release the button and proceed to the remote-learning procedure below.

Press and hold the **FUNCTION button** until the transmit LED turns on, then release the button.

Press and hold the **REMOTE START button** until the transmit LED flashes **3 times**, then release the button.

Press the **LOCK button** until the siren or horn sounds to confirm the remote has been learned.

A sequence of chimes should sound from the remote to confirm successful pairing. If the chimes are not heard, make sure the system is still prepared for learning and repeat the remote-learning procedure.
