

ESCORT MAX 4 Radar & Laser Detector

Brand: Escort Radar

Product Code: MAX-4

Stock: 1

UPC: 737795005612

MPN: MAX-4 0100056-1

Location: Cleveland, OH

Price: ~~\$399.99~~ \$349.99

Short Description

The **ESCORT MAX 4** combines exceptional radar detection range, advanced false-alert filtering and intelligent GPS AutoLearn technology in an easy-to-use premium radar and laser detector. Dual-core processing, directional alert information, Drive Smarter connectivity and Apple CarPlay and Android Auto integration provide powerful everyday protection and increased road awareness.

Description

ESCORT MAX 4 Radar & Laser Detector

The **ESCORT MAX 4** delivers exceptional radar detection performance, intelligent false-alert filtering and connected driving technology in an easy-to-use premium radar and laser detector.

Featuring an advanced antenna platform with **Low-Noise Amplifier technology, dual-core processing, GPS AutoLearn and digital signal processing**, the MAX 4 is designed to provide impressive detection range while reducing unnecessary distractions from false alerts.

Exceptional Detection Range

The MAX 4 uses ESCORT's advanced antenna platform with **Low-Noise Amplifier technology** to provide exceptional radar detection range, helping alert you to radar activity farther ahead and giving you greater awareness of the road.

A new **dual-core processor provides twice the processing power** compared with previous generations, allowing the detector to rapidly analyze incoming signals and deliver useful alert information.

Twice the Filtering Accuracy

Modern vehicles and roadside electronics can generate radar signals that create unnecessary alerts. The MAX 4 is engineered with improved filtering accuracy to help distinguish meaningful radar signals from common sources of interference.

The result is a **quieter and less distracting driving experience** without sacrificing the detection performance expected from an ESCORT radar detector.

Clear, Easy-to-Read Alert Information

The MAX 4's graphic multi-color OLED display provides clear information about detected threats and driving alerts. Directional alert information helps provide additional context when compatible alerts are received.

GPS AutoLearn Intelligence

ESCORT's **GPS-based AutoLearn technology** learns your regularly traveled routes and recognizes repeated stationary false-alert locations. Over time, the detector can automatically reject these familiar false alerts, helping make everyday driving quieter.

Built-in GPS also supports location-based driving information and compatibility with ESCORT's Defender Database for available red-light and speed-camera notifications.

Drive Smarter, Apple CarPlay & Android Auto

Connect the MAX 4 to ESCORT's **Drive Smarter app** to access connected driving features and

manage compatible device settings.

Drive Smarter works with **Apple CarPlay and Android Auto**, allowing compatible vehicles to display shared radar and laser alerts, red-light and speed-camera locations, crowdsourced road information and other supported alerts directly through the vehicle's compatible display.

Shared Alerts & Defender Database

Through the Drive Smarter connected community, compatible connected detectors can provide advance warning of radar and laser alerts reported by other drivers.

The MAX 4 also supports ESCORT's **Defender Database** for red-light and speed-camera location information. Database access and certain connected services may require activation, connectivity or a subscription.

Radar & Laser Detection

The ESCORT MAX 4 provides radar and laser detection for the primary enforcement technologies encountered on the road, including **X, K and Ka-band radar** and laser detection.

For customers seeking a more comprehensive system, **Access 1 Alarm & Audio** also offers professionally installed radar detection and dedicated laser defense solutions for compatible vehicles.

MAX 4 Performance

- Exceptional radar detection range
- Low-Noise Amplifier technology
- Advanced false-alert filtering
- Twice the filtering accuracy
- Dual-core processor
- 2X processing power vs. previous generations
- Digital signal processing
- GPS-based AutoLearn intelligence

- X, K and Ka-band radar detection
- Laser detection

Intelligence & Connectivity

- Built-in GPS
- Drive Smarter app compatibility
- Apple CarPlay integration
- Android Auto integration
- Shared network alerts
- Defender Database compatibility
- Bluetooth connectivity
- Graphic multi-color OLED display
- Compatible with ESCORT M2 dash camera
- Compatible with ESCORT laser shifters

What's Included

- ESCORT MAX 4 radar detector
- EZ Mag Mount windshield mount
- SmartCord USB + Mute
- Travel case
- Product documentation

Professional Hardwire Installation Available

Don't want a power cord hanging from your windshield? **Access 1 Alarm & Audio** can professionally hardwire your ESCORT MAX 4 for a cleaner installation with concealed wiring and convenient detector placement. Access 1 has served **Cleveland and Northeast Ohio for over 20 years**, specializing in radar detection, laser defense, remote start, vehicle security, dash cameras and advanced automotive electronics.

Radar detector and laser countermeasure laws vary by jurisdiction. Vehicle owners are responsible for understanding and complying with applicable laws where the vehicle is operated. Product features, connected services and compatibility may change through firmware, software or service updates. Defender Database access and certain connected services may require activation or subscription.
