2-WAY LCD LCD display provides visual system feedback.

5-BUTTON CONTROL Convenient control of compatible security and remote-start functions.

REPLACEMENT REMOTE Ideal for replacing a lost, damaged or worn 7341P remote.

Python 7341P Remote Control

The **Python 7341P** is a 2-way LCD remote designed for use with compatible Python vehicle security and remote-start systems. Its LCD screen provides visual confirmation and system status information when communicating with a compatible system.

This is a **genuine Python remote control**, making it the proper choice when replacing an existing Python 7341P.

Python 7341P Specifications

Model:

7341P

Brand:

Python

Remote Type:

2-Way LCD

Controls:

5-Button

Application:

Security / Remote Start

Condition:

New

Important Compatibility Information

Remote-control compatibility is determined by the **installed security or remote-start system and receiver / Control Center**, not by the vehicle's year, make or model.

If your existing remote is marked **Python 7341P**, this is the same remote-control model.

If you are replacing a different remote model, verify that the Python 7341P is compatible with your installed system before ordering.

Programming Instructions

Python 7341P Remote Programming Instructions

The following Learn Routine is used to program the **Python 7341P 2-Way LCD remote control** to a compatible system.

Prepare the Vehicle System for Pairing

1. **Door:** Open a door.
2. **Key:** Turn the key to the **ON** position.
3. **Choose:** Within 5 seconds, press and release the **Valet/Program button** the number of times corresponding to your system in the table below. Then press the Valet/Program button one more time and **hold it**. The LED flashes the same number of times as the selected channel and the siren chirps to confirm the selected channel. **DO NOT release the Valet/Program button.**
4. **Transmit:** While continuing to hold the Valet/Program button, press the **LOCK button** on the remote. The unit chirps to confirm that the remote has been paired

to the receiver.

5. **Release:** Once the remote control has been paired, release the Valet/Program button and remove the key.

Valet/Program Button Selection

1 Time	Python 5305P
7 Times	Python 3305P / Responder 460

Important: The number of Valet/Program button presses is determined by the Python system being programmed. Use **1 press for the 5305P** or **7 presses for the 3305P / Responder 460**.

Note: Refer to the owner's guide for remote-control operation after programming is complete.
