Brand: Viper
Product Code: SKS-SPRINTER-907
Stock: 5
UPC: SKSNG907
MPN: SKS-SPRINTER-907
Location: Cleveland, OH

Price: $1,499.99

Short Description
2019–2024 Mercedes-Benz Sprinter factory-key remote start — $1,499.99 professionally installed in Cleveland. A working spare factory key is required. Includes OEM-style alarm and high idle with no dealer programming required. Factory lock-unlock-lock control, steering-wheel settings and optional external auto-start integration for RV owners and work vans.

Description
MERCEDES-BENZ SPRINTER • 2019–2024

Factory-key convenience. Professionally installed in Cleveland, Ohio.

Remote start your 2019–2024 Mercedes-Benz Sprinter with the factory key you already carry. Give the cabin time to warm up during a Cleveland winter or begin cooling before a summer drive, with temperature-based control of compatible factory comfort features.

Working Spare Factory Key Required

You must supply a working spare factory key for this installation. We confirm your exact Sprinter configuration, factory equipment and key compatibility before booking.

FACTORY KEY CONTROL
lock-unlock-lock activation.
AUTOMATIC COMFORT
Temperature-based heated seat and defroster activation.
INSTALLATION INCLUDED
$1,499.99 at our Cleveland shop.

OEM-Style High Idle for RV Owners & Work Vans

OEM-style high idle is included, with no dealer programming required. It can activate automatically after remote start, with the idle RPM setting programmed through the instrument-cluster menu.

With the parking brake engaged, pull the turn-signal stalk toward you to turn high idle on or off. We demonstrate the configured controls at pickup.

Optional external automation: Start, stop and status-output triggers can integrate with compatible battery monitors, compressor monitors, temperature monitors and other control equipment. This can support RV house-battery management or work-van equipment needs when professionally configured.

Repeat-start behavior: A maintained external auto-start request can cause the system to restart after its run time expires. It can continue running and restarting until the external controller cancels the request. Confirm the monitor’s stop logic, safeguards and required interfaces before enabling automation.

Optional monitors, relays, interfaces and charging-system upgrades must be confirmed separately. Charging performance depends on the vehicle, battery system and electrical loads. Automatic engine operation requires appropriate safeguards and use outdoors with

adequate ventilation.

Designed Around Your Sprinter

- **Factory-key remote start:** Works with the lock-unlock-lock sequence on your existing factory fob.
- **OEM-style alarm included:** Built-in alarm functionality requires no additional alarm hardware. Compatible shock, glass-break, tilt and vehicle-movement sensors or a full external Directed alarm can be added separately.
- **External-alarm compatibility:** Some external-alarm configurations may prevent factory-fob remote start and require compatible RF remotes or smartphone control instead. The OEM fob can still arm and disarm the alarm. Confirm the selected alarm configuration before installation.
- **Smartphone and RF interfaces:** Supports Directed / Viper SmartStart and compatible RF remotes for extended range. AM remotes are not compatible.
- **2-way alarm notifications:** Supported factory and/or external alarm notifications are available through compatible Directed / Viper SmartStart hardware, equipment and service.
- **Anti-theft / anti-carjacking capability:** Requires compatible smartphone-control hardware and active service. We confirm fitment and demonstrate configured operation and limitations at installation.
- **Automatic comfort:** Factory heated seats, cooled seats and rear defroster can activate at programmable outside-temperature thresholds when compatible equipment is fitted.
- **Steering-wheel programming:** Adjust supported run time, heated/cooled-seat and defroster thresholds, light flashes and timer start. Sensor-sensitivity adjustments require compatible optional sensor hardware.
- **Sensor integration:** Compatible plug-and-play shock, glass-break, tilt and movement sensors can interface with the factory alarm and supported SmartStart notifications. Sensors and required interfaces are optional.
- **Vehicle-specific installation:** Plug-and-play integration, programming and testing are tailored to the vehicle. Factory warranty coverage follows the manufacturer’s terms; installation time depends on configuration and added options.

Available controls, status and notifications depend on the vehicle, installed hardware and selected service plan. Accessories and external control equipment are separate unless specifically included.

$1,499.99 Installed

Includes the SKS-SPRINTER-907 system, required harnesses, programming and professional installation. Operates with your existing factory key fob; additional handheld remotes are not included. **You must supply a working spare factory key for installation.**

Available Smartphone Upgrade

Directed / Viper SmartStart +$200

Add cellular smartphone control for virtually unlimited range. Start your vehicle from virtually anywhere in the world with an active service plan, phone internet access and compatible cellular coverage at the vehicle. Available smartphone features include start/stop, lock/unlock, vehicle status, GPS location and alarm notifications, depending on vehicle equipment, interface and plan. Optional anti-theft/anti-carjacking immobilization requires compatible hardware and active SmartStart service; ask us to confirm operation and limitations for your vehicle. Cellular service is separate from the installed package. Ask to add SmartStart when booking.

Installation & Warranty

Professionally installed, programmed and tested at **Access 1 Alarm & Audio, 10418 Lorain Ave, Cleveland, OH 44111**. Includes a **5-year system warranty** and installation labor coverage **for as long as you own the vehicle**. Existing factory keys, optional cellular hardware and cellular services have separate coverage and terms.

Frequently Asked Questions

Is a spare factory key required?

Yes. You must supply a working spare factory key for installation. We confirm key compatibility and your exact vehicle configuration before scheduling.

How do I activate remote start?

Use lock-unlock-lock on the factory key fob. Compatible RF remotes or smartphone control can be added. Some external-alarm configurations require an external control

device for remote start, while the OEM fob retains alarm arm/disarm functions.

Is high idle included, and does it need dealer programming?

OEM-style high idle is included and requires no dealer programming. It can activate after remote start, and the idle RPM setting is programmed through the instrument-cluster menu.

How do I turn high idle on or off?

With the parking brake engaged, pull the turn-signal stalk toward you to turn high idle on or off. We demonstrate the configured operation at pickup.

Can an RV battery monitor or other equipment control auto start?

Optional start, stop and status-output triggers support compatible battery, compressor, temperature and other monitors with the required interfaces. A maintained start request can cause repeated starts after run-time expiry until the controller cancels the request. Professional configuration and appropriate safeguards are required.

What alarm equipment is included?

OEM-style alarm functionality is included without additional alarm hardware. Compatible sensors and a full external Directed alarm may be added separately. Confirm the effect of the chosen external-alarm configuration on factory-fob remote start before booking.

Is SmartStart included?

Viper SmartStart is an optional $200 upgrade. Supported smartphone commands, status, GPS location and 2-way alarm notifications require compatible installed equipment, active service and cellular coverage.

What comfort and programming functions are supported?

Compatible factory heated seats, cooled seats and rear defroster can activate at

programmable temperature thresholds. Steering-wheel controls support run time, temperature thresholds, light flashes and timer-start settings; sensor sensitivity requires compatible added sensors.

Does $1,499.99 include installation?

Yes. The remote start system, included OEM-style alarm and high-idle functions, required harnesses, programming and professional installation are included. You must supply a working spare key. Optional SmartStart, remotes, sensors and external controllers are separate.

What warranty is included?

The installed system has a 5-year warranty, with installation labor covered for as long as the original purchaser owns the vehicle. VSM550 Pro has a 1-year warranty when supplied. Existing factory keys, cellular service and separately purchased accessories have separate terms.

Call to confirm your **2019–2024 Mercedes-Benz Sprinter** compatibility, then schedule installation at **10418 Lorain Ave, Cleveland, OH 44111.**
