ESCORT Redline Ci-c Platform Custom Installed Radar Detector

Brand: Escort Radar
Product Code: REDLINE-CIC
Stock: 1
UPC: 737795005414
MPN: REDLINE-CIC 0100054-1

Price: $1,899.99

Short Description

The **ESCORT Redline Ci-c Platform** delivers legendary Redline radar detection performance in a completely concealed, professionally installed system. This configuration includes **front radar detection only** with ESCORT's M14 receiver, Blackfin DSP, TotalShield stealth technology, GPS AutoLearn and dual-band Wi-Fi. Add an optional rear radar receiver for 360° radar coverage, or pair the Redline Ci-c with a dedicated **AL Priority laser defense system** for customers who want premium radar detection and a separate high-performance laser solution.

Description

ESCORT Redline Ci-c Platform Custom Installed Radar Detector

The **ESCORT Redline Ci-c Platform** brings legendary Redline radar detection performance to a completely concealed, professionally installed system. Designed around ESCORT's advanced **M14 radar receiver and Blackfin DSP**, the Redline Ci-c delivers exceptional detection range, advanced false-alert filtering and TotalShield stealth technology without a portable detector

mounted on your windshield.

This Platform configuration is intentionally modular. It includes **front radar detection only — no rear radar receiver and no laser shifters are included.** A rear radar receiver can be added for additional cost to provide 360° radar coverage, while customers who want a dedicated high-performance laser defense solution can pair the Redline Ci-c radar system with a professionally installed **AL Priority laser defense system**.

Redline Ci-c Platform — Know What's Included

This is the Redline Ci-c Platform configuration with front radar detection. It is not the complete Redline Ci 360c system.

- **Front M14 radar receiver — INCLUDED**
- **Rear radar receiver — NOT INCLUDED**
- **Laser shifters — NOT INCLUDED**
- Optional rear radar receiver can be added for additional cost
- System can be paired with AL Priority laser defense
- Professional installation is additional and required

Legendary Redline Detection Range

At the heart of the Redline Ci-c is ESCORT's **M14 radar antenna coupled with Blackfin DSP**. This combination provides exceptional radar detection range and sensitivity while allowing the receiver itself to be discreetly installed in the vehicle.

Unlike a windshield-mounted portable detector, the Redline Ci-c becomes part of the vehicle. The radar receiver is concealed at the front of the vehicle while the display and controls can be integrated into the interior for a clean, factory-style appearance.

Advanced False-Alert Filtering

Today's vehicles can generate significant radar interference from **blind-spot monitoring (BSM),**

collision-avoidance systems (CAS) and other driver-assistance electronics.

ESCORT combines **DSP and SDR technology** to provide advanced filtering against these unwanted signals, helping the Redline Ci-c deliver the quiet driving experience expected from a premium custom-installed detector.

TotalShield™ True Stealth Technology

ESCORT's **TotalShield technology** is engineered to provide true stealth performance against radar-detector detectors (RDDs). Combined with the completely concealed installation of the Redline Ci-c, the system provides exceptional discretion without sacrificing radar detection performance.

GPS AutoLearn™ Intelligence

ESCORT's **AutoLearn technology** uses GPS intelligence to recognize frequently encountered stationary false-alert locations. As you drive your normal routes, the system can learn these locations and reduce unnecessary repeated alerts.

Drive Smarter®, Bluetooth & Dual-Band Wi-Fi

The Redline Ci-c integrates with ESCORT's **Drive Smarter** ecosystem through Bluetooth, providing access to supported connected driving features and shared alert information.

Built-in **dual-band Wi-Fi** allows supported over-the-air software updates, helping keep the system's software current without removing the concealed components from the vehicle.

Start with Front Radar — Add Rear Radar When You Want It

The Redline Ci-c Platform supplied here uses a **single front radar receiver**. This provides premium forward radar detection while keeping the initial system cost below the complete Redline Ci 360c package.

If you want complete front-and-rear radar coverage, an **optional rear radar receiver can be added for additional cost**. With the rear receiver added, the system provides 360° radar coverage and additional directional threat information.

Want Dedicated Laser Defense? Pair It with AL Priority

One of the biggest advantages of choosing the **Redline Ci-c Platform** is flexibility. You are not required to purchase ESCORT laser shifters simply to get Redline's custom-installed radar detection technology.

For customers who want a dedicated premium laser defense solution, **Access 1 Alarm & Audio can combine the Redline Ci-c with an AL Priority laser defense system.** This allows the Redline Ci-c to handle radar detection while the independently installed AL Priority system handles laser defense.

A Truly Custom Installation

The Redline Ci-c is not a plug-in radar detector. It is a **professional custom-install system**. The radar receiver is concealed externally, while the compact display and control panel can be positioned inside the vehicle based on visibility, accessibility and the design of the interior.

Access 1's installation technicians can determine component placement based on the specific vehicle, allowing the finished installation to complement the factory interior while maintaining proper radar receiver performance.

Redline Ci-c Performance

- M14 front radar receiver
- Blackfin DSP processing
- SDR signal-processing technology
- Advanced BSM and CAS false-alert filtering
- TotalShield stealth technology
- GPS AutoLearn intelligence
- Completely concealed radar receiver
- Custom-installed display and controller

Expandable Platform

- Front radar receiver included
- Optional rear radar receiver
- 360° radar coverage with optional rear receiver
- Laser shifters are not included
- Can be paired with AL Priority laser defense
- Bluetooth connectivity
- Dual-band Wi-Fi
- Drive Smarter compatibility
- Over-the-air software update capability

Redline Ci-c Platform — $1,899.99 + Professional Installation

Professional installation is required and priced separately based on the vehicle, component placement and installation complexity.

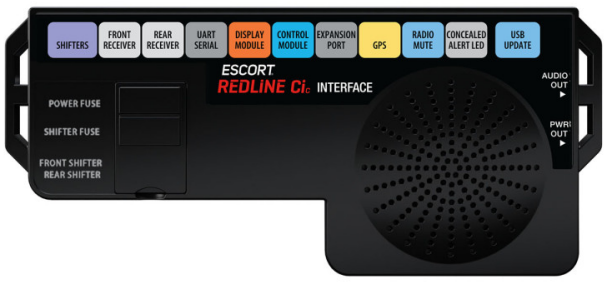

Optional equipment including the rear radar receiver and a professionally installed AL Priority laser defense system is available at additional cost. Contact **Access 1 Alarm & Audio** at **(216) 252-3000** for a vehicle-specific system and installation quote.

This listing is for the ESCORT Redline Ci-c Platform configuration. Rear radar receiver and laser defense equipment are not included in the $1,899.99 product price. Professional installation is required and additional. Radar detector and laser countermeasure laws vary by jurisdiction. Vehicle owners are responsible for compliance with applicable laws.
