

HDZ-65CS

Alpine Status Hi-Res 6.5" 2-Way Slim-fit Component Speakers

PRODUCT OVERVIEW

Highest in-class audio performance at an accessible price point makes Alpine Status the ultimate sound upgrade.

PRODUCT FEATURES

Hi-Res Playback – Building a sound system while overcoming acoustical challenges in the interior environment of the vehicle is no easy feat, however, the Alpine Status speaker line provides Hi-Res audio playback up to 192kHz/24Bit for an infallible listening experience.

Trickle-Down Tech - Using trickle-down engineering and design from the Ultra Hi-Res AlpineF#1Status System, the full Alpine Status speaker line is made from the same Carbon Composite material to create a unified timbre identity during playback and features Alpine's proprietary double gathered edge type surrounds for music reproduction that's accurate to the original source.

Studio-Level Sound – Custom developed for Hi-Res Playback, the Alpine Status speaker line has an ultra-wide audio bandwidth of 55Hz-40kHz which is perfectly suited for accurate reproduction of even the highest quality of studio recordings.

Flexible System Building – The Alpine Status speaker line features two fitments for flexible installation options including a custom-fit model for custom applications and factory-fit models that were intentionally designed to fit into most factory speaker holes without custom work.

The HDZ-65CS is a factory-fit model that includes a 6.5-inch Mid-bass driver and 1-inch Slim-fit High range driver.

HDZ-65CS

Alpine Status Hi-Res 6.5" 2-Way Slim-fit Component Speakers

MAIN FEATURES

- **Hi-Res Audio Playback**
- **Carbon composite diaphragm material on all drivers for consistent tonal characteristics across a very wide system frequency response.**
- **Alpine proprietary double gathered edge surround resulting in super low distortion and linear diaphragm movement that keeps the music reproduction accurate to the original source.**

TECH SPECS

- **Woofer Size:** 6.5" (16.5cm)
- **Tweeter Size:** 1" (2.5cm)
- **Hi-Res Audio Playback:** 192kHz/24Bit
- **Maximum Peak Power:** 300W
- **Maximum RMS Power:** 100W
- **Sensitivity:** 88dB
- **Frequency Response:** 55Hz - 40kHz (Hi-Res)

BUILD AN ALPINE STATUS SYSTEM

Optimized for a Full System – The Alpine Status System is sold separately and can be used to build a custom sound system. For best results, install the complete Alpine Status system together as a full system to achieve the highest in class audio performance only second to the Ultra High-Resolution AlpineF#1System.
